

Press Release – Brussels, Oct 19th, 2012

Release of the ISTQB® Glossary Version 2.2

At the ISTQB® General Assembly meeting in Cape Town (October 2012), the ISTQB® “standard glossary of Testing terms”, version 2.2 was approved for release.

This new ISTQB® glossary has the following main new additions:

- Full support for testing terms used in the newly released 2012 **ISTQB® Advanced syllabi** (Test Manager, Test Analyst and Technical Test Analyst)
- Full support for testing terms used in the **Expert level module syllabus “Test Management”** (released late 2011)
- Explicit identification of keywords used in the various ISTQB® syllabi at Foundation, Advanced and Expert level.

Since the glossary uses the principle of backwards compatibility as much as possible, this version can be used today by all stakeholders and formally replaces glossary version 2.1.

About ISTQB®

The International Software Testing Qualifications Board is a non-profit organization, headquartered in Brussels, Belgium, whose mission is to advance the software testing profession. It is supported in its operations by 46 member boards, representing over 70 countries.
